

Cloud Solution Architect

Do you want to be part of an ambitious and enthusiastic team in a fast-moving scale-up environment? Are you looking for a challenging context where you will get the chance to develop your talents? Are you eager to accelerate your career as a **Cloud Solution Architect** in a fast-growing regtech company?

Well, let us introduce itsme® / Belgian Mobile ID, founded in 2017 with a clear mission: provide a state-of-the-art and best-in-class digital identity solution to individuals, enabling them to move all their interactions to the digital space. Now, only five years later, 6.4 million citizens use the itsme® app, to identify themselves, confirm transactions and sign documents online. We are also ready for a new challenge: launching the itsme® app in The Netherlands.

We are looking for a Cloud Solution Architect, whose mission will be to drive itsme® architecture on our Azure Cloud.

What your job looks like

- Help us defining the overall itsme® IT strategy and architecture with a focus on resilience, performance and security.
- You understand the business vision, strategy and roadmaps of the business project.
- You draft an architecture covering all dimensions of a project/product – functional and technical design (supported by technical architect), covering all non-functional requirements, including performance requirements, security needs, operations needs and many more.
- You are the glue between product owners, designers and technical experts.
- You help translating our cloud architecture into a product delivery
- You provide clear and structured communication and documentation, to users, functional analysts, operations and management
- As an architect, you help us in translating business requirements into an functional architecture selecting the right technologies from our blueprints or identify needs for letting our technical architecture/landscape evolve.
- Solve complex problems and document them in an understandable fashion. Help our product owners/managers during the concept/design phase understanding our technological stack, application landscape and overall development practices.
- Guide our projects through our blueprints and link with our technical architecture to design new solutions in our Azure Cloud.

What we are looking for

- Bachelor or Master degree (engineering or computer science background).
- Multi-year (5+) experience working on architecture in a public cloud environment.
- (Similar) Experience with scalable architectures using Azure App Service, API management, serverless technologies, container orchestration (e.g. Kubernetes), API management, Microservice frameworks, SDKs.
- Software development practices like DevOps and CI/CD tool chains (e.g. Azure DevOps, GitHub, ...).
- You are service and client oriented - balance logical problem solving with innovative thinking.
- Problem-Solving / Hands-on mindset – able to solve customer problems through cloud technologies
- You are a team player who shares his/her knowledge and enjoys celebrating joint achievements. Acknowledged for driving decisions collaboratively, resolving conflicts and ensuring follow through with exceptional verbal and written communication skills.
- Possess strong written and verbal communication and presentation skills
- You speak and write fluently English and have a good knowledge of French or Dutch.

What we offer

- A fun, enthusiastic and ambitious team
- A fast-moving scale-up environment where you can develop and grow
- Offices in Brussels, combined with flexibility in terms of remote working
- A fixed contract, with an attractive compensation package

Now it's your turn!

If you have what it takes, send your CV and motivation letter to career@itsme-ID.com.
