

Functional Architect

Do you want to be part of an ambitious and enthusiastic team in a fast-moving scale-up environment? Are you looking for a challenging context where you will get the chance to develop your talents? Are you eager to accelerate your career as a **Functional Architect** in a fast-growing regtech company?

Well, let us introduce itsme® / Belgian Mobile ID, founded in 2017 with a clear mission: provide a state-of-the-art and best-in-class digital identity solution to individuals, enabling them to move all their interactions to the digital space. Now, only five years later, 6.4 million citizens use the itsme® app, to identify themselves, confirm transactions and sign documents online. We are also ready for a new challenge: launching the itsme® app in The Netherlands.

We are looking for a Functional Architect whose mission it will be to provide technical leadership drafting the overall application design, and mapping client business requirements to systems/technical requirements

What your job looks like

- As an architect, you help us in translating business requirements into a functional architecture selecting the right technologies from our blueprints or identify needs for letting our technical architecture/landscape evolve.
- Develop functional design specifications and business process maps that document project plans, production systems
- Identify, analyse, and communicate architecture and integration options and make recommendations to management.
- Interact with stakeholders to map business requirements into functional solutions that optimally balance cost, speed of implementation, and value
- You provide clear and structured communication and documentation, to users, functional analysts, operations and management
- Solve complex problems and document them in an understandable fashion. Help our product owners/managers during the concept/design phase understanding our technological stack, application landscape and overall development practices.
- Guide our projects through our blueprints and link with our technical architecture to design new solutions in our Azure Cloud.
- Participate in process flow analysis and process redesign
- Co-team with the Cloud/Infrastructure Architect to produce a technical specification for custom development and systems integration requirements
- Provide current best practice and 3rd Party solution alternatives as part of the functional design

What we are looking for

- Bachelor or master's degree or equivalent experience
- You are familiar with the agile way of working and you understand interdependencies between customer/business needs, operations, and technology
- You interact with both technical and functional customers to understand requirements, analyse information, and design comprehensive solutions
- You are a strong presenter and facilitator, aiming to obtain customer acceptance by understanding and delivering the right strategic vision, and driving the difficult conversations necessary to execute business strategies.
- You contribute to thought leadership and best practices - both internally in and externally and advocate for change across the organization
- You are familiar with environments where security and data privacy is of utmost importance
- You have an analytical mindset and excellent problem-solving skills
- You pro-actively come up with improvements or new ideas, you always put the customer first
- You are able to plan, manage and coordinate multiple tasks simultaneously
- You are a team player who shares his/her knowledge and enjoys celebrating joint achievements, but you can also work autonomously
- You are fluent in English (Dutch and/or French is a plus)

What we offer

- A fun, enthusiastic and ambitious team
- A fast-moving scale-up environment where you can develop and grow
- Offices in Brussels, combined with flexibility in terms of remote working
- A fixed contract, with an attractive compensation package

Now it's your turn!

If you have what it takes, send your CV and motivation letter to career@itsme-ID.com.
